**Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings** From CRC Press

## Highly Commended, BMA Medical Book Awards 2015

In 2008, Paul Farmer and Jim Yong Kim described global surgery as the "neglected stepchild" of healthcare, and now leaders from around the world are working to redefine it as a human right through the Lancet Commission on Global Surgery. In order to help advance global surgery and anesthesia as a public health intervention, providers require a practical, hands-on manual to train and educate them to provide safe and effective surgery and anesthesia in resource-limited settings. In an effort to respond to that need, over 140 clinicians from high-, low-, and middle-income countries collaborated to create the **Global Surgery and Anesthesia Manual: Providing Care in Resource-Limited Settings**.

This guide provides in-depth instruction on epidemiology and ethics surrounding surgical services, and on anesthesia, perioperative care, trauma surgery, and non-trauma surgery. With contributions from a group of culturally and academically diverse clinicians, each chapter is enriched by at least one commentary from a surgeon or anesthesia provider in a low- or middle-income country (LMIC) who shares first-hand perspectives on the realities and complexities of providing surgical care in these settings with limited resources.

The book will serve as a core reference for surgeons and anesthesiologists at all levels interested in global surgery. It will assist those working in LMICs who are confronted with surgical problems that they are not routinely exposed to in their traditional practice. Filled with expert guidance, decision-making algorithms, and treatment options, it will also serve as an invaluable text for trainees in LMICs as it covers the majority of surgical disease processes that would be encountered in such settings.

## **Editorial Review**

### **About the Author**

John G. Meara, MD, DMD, MBA, FACS, FRACS is Director of the Program in Global Surgery and Social Change at Harvard Medical School, Chairman of the Executive Committee of the Harvard Plastic Surgery Training Program, and Plastic Surgeon-in-Chief at Boston Children's Hospital. Since 2008, he has Co-Directed the Paul Farmer Global Surgery Fellowship program in collaboration with Partners in Health. His clinical interests and innovation activities are in the areas of craniofacial anomalies, and cleft lip and cleft palate. Dr. Meara is particularly interested in augmenting the delivery of quality surgical care in low-resource settings, and serves as chair for the Lancet Commission on Global Surgery.

Craig D. McClain, MD, MPH is an anesthesiologist at Boston Children's Hospital, an Assistant Professor of Anesthesia, and Affiliate Faculty in the Department of Global Health and Social Medicine at Harvard Medical School. He has spent time working in multiple low-resource countries in Asia, Africa, South America, and the Caribbean. He currently serves as the lead anesthesiologist for Harvard Medical School for the Human Resources for Health project in Rwanda. He is the founder and Director of the Global Pediatric Anesthesiology Fellowship at Boston Children's Hospital. His academic interests include improving the perioperative care of children undergoing neurosurgical procedures, as well as improving the safe delivery of anesthesia and perioperative care in low-resource countries.

Selwyn Rogers, Jr., MD, MPH, FACS has served as Division Chief of Trauma, Burn, and Surgical Critical Care at Brigham and Women's Hospital. In 2005, Dr. Rogers helped launch the Center for Surgery and Public Health, whose mission is to understand the nature, quality, and utilization of surgical care globally. His research includes examining processes to improve quality of care and improving the understanding surgical disparities to close the quality chasm for underserved populations nationally and globally. Dr. Rogers served as Surgeon-in-Chief of Temple University Health System from 2012 to 2014. He now serves as Chief Medical Officer at the University of Texas Medical Branch.

David P. Mooney, MD, MPH, FACS is Director of the Trauma Center at Boston Children's Hospital, an Associate Professor in Surgery, and Affiliate Faculty in the Department of Global Health and Social Medicine at Harvard Medical School. He has been active in Partners in Health and was a part of the U.S. National Disaster Medical System response to the 2010 Haitian earthquake. He is one of the founders of the Pediatric Trauma Society. His interests include the development of trauma care and trauma systems for children in a variety of resource settings.

## **Users Review**

### **From reader reviews:**

**Jamie Hernandez:**

Book is to be different for every single grade. Book for children until eventually adult are different content. We all know that that book is very important for all of us. The book Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings seemed to be making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The reserve Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings is not only giving you much more new information but also to be your friend when you truly feel bored. You can spend your own spend time to read your publication. Try to make relationship while using book Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings. You never really feel lose out for everything should you read some books.

**Maria Trussell:**

Information is provisions for anyone to get better life, information currently can get by anyone from everywhere. The information can be a knowledge or any news even an issue. What people must be consider while those information which is inside former life are difficult to be find than now's taking seriously which one is acceptable to believe or which one often the resource are convinced. If you obtain the unstable resource then you have it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings as the daily resource information.

**Daniel Watkins:**

In this period of time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Often the book that recommended to you is Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings this reserve consist a lot of the information with the condition of this world now. This kind of book was represented how does the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The particular writer made some research when he makes this book. That is why this book ideal all of you.

**John Fouts:**

As we know that book is significant thing to add our information for everything. By a book we can know everything we really wish for. A book is a group of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This publication Global Surgery and Anesthesia Manual: Providing Care in Resource-limited Settings was filled in relation to science. Spend your spare time to add your knowledge about your scientific research competence. Some people has various feel when they reading the book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you simply wanted.
