## **Heterocyclic Chemistry at a Glance** By John A. Joule, Keith Mills

An understanding of the chemistry of heterocycles is essential in the study and application of organic chemistry, as well as being a central part of the increasingly popular medicinal and pharmaceutical chemistry degree courses.

Heterocyclic Chemistry at a Glance provides a concise overview of the main principles and reactions of heterocyclic chemistry, for students studying chemistry and related courses at undergraduate level. Based on the highly successful and student friendly "at a glance" approach, the material developed in this book has been chosen to help the student grasp the essence of heterocyclic chemistry, ensuring that they can confidently use that knowledge when required.

Students wanting an accessible overview of heterocyclic chemistry will find this book an ideal source of the information they require. In addition the structure of the book, which facilitates the rapid assimilation, understanding and recall of critical concepts, facts and definitions, will provide an invaluable aid to revision for students preparing for examinations.

## Editorial Review

### Review

"Joule and Mills have succeeded here in condensing the essence of introductory undergraduate heterocyclic chemistry into a slim volume, presented (as is the way in this series) in an A4 page format and in a very easy-to-grasp style with many structures and reactions. All of the key areas are covered.

...the price and the concise nature of the text make it a feasible purchase and easy read for all those working in the area. I shall certainly be recommending it to my own classes." *Chemistry World*

"Joule and Mills have produced a massive text that broadly covers heterocyclic chemistry... This book can be recommended to students looking for a textbook on heterocyclic chemistry. The organization of the material is oriented towards the needs of undergraduate students, but nevertheless the book is comprehensive and will also be of value for more advanced readers." *Heterocycles*

"This book is the most recent issue in the "at a glance" series from Blackwell Publishing"  
*Journal of Medicinal Chemistry*
