### Editorial Review

#### Review

"Taking a fresh new approach to information on baked products this exciting new book looks beyond the perceived notions of how foods from the bakery are categorised to explore the underlying themes that link the products. This book is a valuable practical resource for all food scientists and food technologists within bakery companies, ingredient suppliers and general food research companies." *Food Engineering and Ingredients, June 2007*

"Baked Products: Science, Technology and Practice is a valuable practical resource for all food scientists and food technologists within bakery companies, ingredient suppliers and general food companies. The book will be an important addition for librarian and research establishments." *Beverage & Food World, September 2007*

"Provide[s] a more detailed understanding to underpin the development of new processes and products. Few can be more qualified to do this than Stan Cauvain and Linda Young. Together they have over 65 years' experience in the industry with a formidable record of publications on baking technology." *Food Science and Technology*

#### From the Back Cover

Taking a fresh approach to information on baked products, this exciting new book from industry consultants Cauvain and Young looks beyond the received notions of how foods from the bakery are categorised to explore the underlying themes which link the products in this commercially important area of the food industry.

First establishing an understanding of the key characteristics which unite existing baked product groups, the authors move on to discuss product development and optimisation, providing the reader with coverage of:

- Key functional roles of the main bakery ingredients
- Ingredients and their influences
- Heat transfer and product interactions
- Opportunities for future product development

Baked Products is a valuable practical resource for all food scientists and food technologists within bakery companies, ingredient suppliers and general food companies. Libraries in universities and research establishments where food science and technology is studied and taught will find the book an important addition to their shelves.

## Users Review

### From reader reviews:

#### **Joshua Parsons:**

Book is to be different for every single grade. Book for children until eventually adult are different content. As you may know that book is very important for us. The book Baked Products: Science, Technology and Practice has been making you to know about other expertise and of course you can take more information. It is very advantages for you. The e-book Baked Products: Science, Technology and Practice is not only giving you much more new information but also to be your friend when you truly feel bored. You can spend your personal spend time to read your publication. Try to make relationship while using book Baked Products: Science, Technology and Practice. You never sense lose out for everything should you read some books.

#### **Ronald Johnson:**

Often the book Baked Products: Science, Technology and Practice will bring one to the new experience of reading a book. The author style to describe the idea is very unique. In the event you try to find new book to learn, this book very suited to you. The book Baked Products: Science, Technology and Practice is much recommended to you to see.
