## Beginning Apache Cassandra Development By Vivek Mishra

*Beginning Apache Cassandra Development* introduces you to one of the most robust and best-performing NoSQL database platforms on the planet. Apache Cassandra is a document database following the JSON document model. It is specifically designed to manage large amounts of data across many commodity servers without there being any single point of failure. This design approach makes Apache Cassandra a robust and easy-to-implement platform when high availability is needed.

Apache Cassandra can be used by developers in Java, PHP, Python, and JavaScript—the primary and most commonly used languages. In *Beginning Apache Cassandra Development*, author and Cassandra expert Vivek Mishra takes you through using Apache Cassandra from each of these primary languages. Mishra also covers the Cassandra Query Language (CQL), the Apache Cassandra analog to SQL. You'll learn to develop applications sourcing data from Cassandra, query that data, and deliver it at speed to your application's users.

Cassandra is one of the leading NoSQL databases, meaning you get unparalleled throughput and performance without the sort of processing overhead that comes with traditional proprietary databases. *Beginning Apache Cassandra Development* will therefore help you create applications that generate search results quickly, stand up to high levels of demand, scale as your user base grows, ensure operational simplicity, and—not least—provide delightful user experiences.

## What you'll learn

- Configure Apache Cassandra clusters
- Model your data for high throughput
- Implement MapReduce algorithms
- Run Hive and Pig queries over Cassandra

- Query with the Cassandra Query Language
- Build graph-based solutions with Cassandra Titan
- Back up your data and restore when needed
- Encrypt and secure your data

## Who this book is for

Beginning Apache Cassandra Development is aimed at developers wanting a high-performing and highly-available database from which to serve large amounts of data at speed to application users. The book is especially suited toward developers working in Java, PHP, Python, and JavaScript who are interested in a NoSQL solution.

### **Editorial Review**

#### **About the Author**

Vivek Mishra is an IT professional and writer with more than ten years of experience in various technologies like Java, J2ee, Hibernate, SCA4J, Mule, Spring, Cassandra, HBase, MongoDB, REDIS, Hive, Hadoop. He has been a contributor for open source like Apache Cassandra and lead committer for Kundera (JPA 2.0 compliant Object-Datastore Mapping Library for NoSQL Datastores like Cassandra, HBase, MongoDB and REDIS).

### **Users Review**

#### **From reader reviews:**

##### **Angela Dreiling:**

What do you in relation to book? It is not important to you? Or just adding material if you want something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? All people has many questions above. The doctor has to answer that question because just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on guardería until university need this particular Beginning Apache Cassandra Development to read.

##### **Francisca Varney:**

A lot of people always spent all their free time to vacation or maybe go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity here is look different you can read the book. It is really fun in your case. If you enjoy the book you read you can spent all day long to reading a reserve. The book Beginning Apache Cassandra Development it is extremely good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. In the event you did not have enough space to deliver this book you can buy the e-book. You can m0ore easily to read this book from a smart phone. The price is not to fund but this book possesses high quality.

##### **Belinda Tenney:**

Are you kind of active person, only have 10 as well as 15 minute in your day to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are having problem with the book compared to can satisfy your short period of time to read it because all this time you only find publication that need more time to be read. Beginning Apache Cassandra Development can be your answer since it can be read by anyone who have those short free time problems.

**Jeff Jones:**

That guide can make you to feel relax. This kind of book Beginning Apache Cassandra Development was colorful and of course has pictures on the website. As we know that book Beginning Apache Cassandra Development has many kinds or category. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that will.
