**Manual of Clinical Paramedic Procedures** By Pete Gregory, Ian Mursell

**'I can enthusiastically recommend the *Manual of Clinical Paramedic Procedures* as the book that I wish had been available to me when I was studying to become a paramedic.'**

*From the foreword by Professor Malcolm Woollard, Chair, College of Paramedics; Professor in Pre-hospital and Emergency Care & Director, Pre-hospital, Emergency & Cardiovascular Care Applied Research Group, Coventry University*

Clinical procedures are a fundamental aspect of care for practitioners working in pre-hospital settings. The *Manual of Clinical Paramedic Procedures* is written specifically to support the practice of paramedics, ambulance technicians, first responders and volunteer ambulance personnel. It presents up-to-date, evidence-based expert knowledge, enabling paramedics to deliver effective, patient-focused care.

This accessible handbook provides a comprehensive exploration of core competencies and skills, looking at topics including Aseptic Technique, Airway Management, Assisted Ventilation, Cardiopulmonary Resuscitation, Defibrillation and External Cardiac Pacing, Observations, Pain Assessment & Management, Respiratory Therapy, Spinal Management and Venepuncture. Each chapter provides the relevant anatomy & physiology, evidence-based rationales for each procedure, and contraindications of use.

Key features:

- The first UK text to explore clinical procedures for paramedics
- With further reading and illustrations throughout
- All procedures include the rationale for the action recommended
- Guides paramedics in the clinical application of evidence-based procedures
