Fish Reproductive Biology: Implications for Assessment and Management

From Brand: Wiley-Blackwell

"The economic importance of fishes and their societal and cultural relevance provide powerful incentives for large-scale, sustained studies of their dynamics"
—**the Editors**

The overall goal of this book is to give a picture of the present use of information on fish reproductive biology in assessment and management and its potential for improving management of these resources.

Compiled by an international team of authors, each an expert in their field, this exceptional volume is divided into three major sections:

- Biology, population dynamics, and recruitment
- Information critical to successful assessment and management
- Incorporation of reproductive biology and recruitment considerations into management advice and strategies

Including over 100 diagrams, this book is essential reading for all fisheries scientists. Libraries in universities and research establishments where this subject is studied and taught should have copies on their shelves.

"As one author put it: the goal is to facilitate a 'dialogue between assessment scientists and biologists.' Readers of any specialty should accept this challenge, and this book is an excellent resource to aid them."

—*Fisheries*, March 2010

Editorial Review

Review

"This book would certainly be an excellent choice for a reading course. ... This is the kind of book that challenges the dogma of introductory courses as well as the methods professionals use to address familiar problems. Each chapter provides personal perspectives, highlights emerging case histories, and illuminates the background conversations that go on at professional conferences and assessment workshops." (*Fisheries*, March 2010)

From the Back Cover

"The economic importance of fishes and their societal and cultural relevance provide powerful incentives for large-scale, sustained studies of their dynamics"

About the Author

Tore Jakobsen, Senior scientist and marine biologist with experience from fish stock assessment and management advice. Employed by IMR since 1970. Head of Demersal Fish Section 1992-1998; Chair of the Advisory Committee on Fishery Management (ACFM) of the International Council for the Exploration of the Sea (ICES) 1999-2002; National Expert on Fisheries Research Projects at the European Commission (DG FISH) 2002-2006.

Michael J Fogarty, Senior Scientist, Northeast Fisheries Science Center, head of the Ecosystem Assessment Program. Research interests and experience include climate effects on marine systems, fisheries ecology, and the dynamics of exploited fish and invertebrate populations.

Bernard A. Megrey, NOAA, National Marine Fisheries Service, Alaska Fisheries Center, Seattle, USA. Research fisheries biologist with NOAA's Alaska Fisheries Science Center, where he has worked since 1982. Extensive experience studying the dynamics of exploited fish populations, relationships of the bio-physical environment to recruitment variability, stock assessment, and climate impacts on marine ecosystems.

Erlend Moksness, Research Director, Institute of Marine Research, Norway. Fisheries biologist with background in recruitment in marine fish, fish ageing, stock enhancement of marine fishes and aquaculture

of marine fishes.

Users Review

From reader reviews:

Jennifer Walker:

What do you concerning book? It is not important together with you? Or just adding material when you need something to explain what your own problem? How about your time? Or are you busy person? If you don't have spare time to complete others business, it is make you feel bored faster. And you have extra time? What did you do? Every person has many questions above. They need to answer that question simply because just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need this kind of Fish Reproductive Biology: Implications for Assessment and Management to read.

Linda Caron:

Your reading sixth sense will not betray an individual, why because this Fish Reproductive Biology: Implications for Assessment and Management book written by well-known writer who knows well how to make book that may be understand by anyone who also read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your current hunger then you still hesitation Fish Reproductive Biology: Implications for Assessment and Management as good book not only by the cover but also from the content. This is one guide that can break don't ascertain book by its deal with, so do you still needing an additional sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to a different sixth sense.

Anthony Flowers:

Beside this particular Fish Reproductive Biology: Implications for Assessment and Management in your phone, it could possibly give you a way to get more close to the new knowledge or info. The information and the knowledge you are going to got here is fresh from the oven so don't always be worry if you feel like an previous people live in narrow commune. It is good thing to have Fish Reproductive Biology: Implications for Assessment and Management because this book offers to your account readable information. Do you often have book but you do not get what it's about. Oh come on, that will not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. Use you still want to miss the item? Find this book and also read it from right now!

Armando Morris:

A lot of reserve has printed but it differs. You can get it by net on social media. You can choose the top book for you, science, comedy, novel, or whatever through searching from it. It is known as of book Fish Reproductive Biology: Implications for Assessment and Management. You'll be able to your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make you happier to read. It is most crucial that, you must aware about publication. It can bring you from one location to other place.
