Intelligence Collection

By Robert M. Clark

Intelligence Collection By Robert M. Clark

The Collection of Intelligence offers systematic and comprehensive coverage of the collection, processing, and exploitation of both literal and nonliteral information. Robert Clark not only explains specific collection systems for analysts, but helps collectors work across boundaries and stovepipes, encouraging them to share collection approaches and to promote cross-pollination of ideas across the collection disciplines. The first part of the book covers open source (OSINT), human intelligence (HUMINT), communications intelligence (COMINT), and cyber collection , while the second part of the book is concerned with signals intelligence (SIGINT), imagery intelligence (IMINT), and others. There is also a chapter devoted to the management of intelligence collection. This full-color guide is richly illustrated with images and graphics that help readers see examples of each type of collection material.

Editorial Review

Review
"Intelligence Collection is an excellent choice for both students and the intelligence community. It is well organized, follows a logical approach, and systematically covers each aspect of intelligence collection." -- Dr. Daniel J. Benny "This book will add tremendously to the study of intelligence, as it lays out the sources of intelligence in a very logical sequence, and in a very easily understandable format." -- Ken Stiles "Robert Clark has developed a text with a comprehensive survey and taxonomy of the myriad disciplines within intelligence collection. He usefully places these in the framework of structure, function, and process. This workman-like approach will be helpful to students new to this subject." -- Kenneth deGraffenreid "I like the extensive use of anecdotal examples, based on actual situations. Each topic's explicit examples provide significant interest as you read through the text." --Robert Duval

About the Author
Robert M. Clark is an independent consultant performing space systems threat analyses for the US Intelligence Community. He is also a faculty member of the Intelligence and Security Academy and a professor of intelligence studies at the University of Maryland University College. Dr. Clark served in the United States Air Force as a SIGINT collector and intelligence officer, reaching the rank of lieutenant colonel. At CIA, he held a variety of assignments that involved supporting the collection, processing and exploitation of HUMINT, SIGINT, and IMINT. As the President and CEO of the Scientific and Technical Analysis Corporation, he managed collection programs in the SIGINT, IMINT, and technical collection disciplines. Clark holds an SB from MIT, a Ph.D. in electrical engineering from the University of Illinois, and a JD from George Washington University. He is a presidential interchange executive, a member of the Virginia state bar, a charter member of the Association of Old Crows, and a patent attorney. Dr. Clark's Intelligence Analysis: A Target-centric Approach is now in its fourth edition. His second book, The Technical Collection of Intelligence, was published in 2010.

Users Review

From reader reviews:

April Wages:

A lot of people always spent their very own free time to vacation or even go to the outside with them family or their friend. Did you know? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity this is look different you can read the book. It is really fun for you personally. If you enjoy the book that you just read you can spent 24 hours a day to reading a guide. The book Intelligence Collection it is quite good to read. There are a lot of individuals who recommended this book. These were enjoying reading this book. In the event you did not have enough space to create this book you can buy the particular e-book. You can m0ore easily to read this book from the smart phone. The price is not very costly but this book features high quality.

Dan Hanner:

Many people spending their moment by playing outside along with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading through a book.
