### Editorial Review

#### Amazon.com Review

Bryan Magee has been one of the most successful English-language popularizers of philosophy in the 20th century; in this coffee-volume, he presents a brief but information-packed history of Western philosophy from pre-Socratic Greek philosophers like Thales and Heraclitus to postmodern French thinkers like Derrida and Foucault. Illustrations fill every page, offering not only portraits of the major philosophical thinkers but illustrations of some of their key concepts, while ample marginalia provide supplementary information for historical context.

#### From School Library Journal

YA-This gloriously illustrated and accessible book enables readers to embark on an adventure in philosophy. The chapters cover "The Greeks and Their World," "Christianity and Philosophy," "The Beginnings of Modern Science," "The Great Rationalists," "The Great Empiricists," "Revolutionary French Thinkers," "A Golden Century of German Philosophy," "Democracy and Philosophy," and "20th-Century Philosophy." The text is profusely illustrated with numerous full-color reproductions of artwork and photographs of historical sites; sidebars introduce additional people and ideas and "Key Works" of the philosophers are listed in light-blue boxes. Writing with a clear and lively style, Magee provides an excellent introduction to the topic. Young adults will find that the often closed doors of philosophy are now open and inviting.
