### Teach Your 3-7 Year Old Math By Mr. John Bowman

In this eBook, an experienced Montessori teacher shows parents how to use a clear sequence of activities to teach their 3-5 year old children about mathematics, or to help their 6-7 year olds who are struggling with math to succeed. Most activities use common items, and recommendations are also given for affordable math learning materials. A link is included to a free collection of math printables for use with many of the activities.. Ideas on helping children learn are followed by activities to develop pre-math skills, and then amounts and numerals into the thousands, the Decimal System, operations with numbers, fractions, solid and plane geometric shapes, and many activities for using math skills in everyday life. Most children naturally develop an increased interest in numbers and language at around 3-5 years of age. This book shows you how to make the most of this sensitive period to give your child a firm foundation of math skills, and a positive, confident attitude toward number work that will carry on throughout the school years. There is no need for children to dislike math! Starting early with these fun, simple activities, you can send your child to kindergarten or first grade already doing math at a second to fourth grade level, setting the stage for early and continued success. If your child is having problems with math in kindergarten through second grade, these activities can save the day and turn math from a struggle to success!

### **Editorial Review**

#### **About the Author**

John Bowman's most rewarding career was spent as a Montessori preschool Teacher and Director. He started three new Montessori schools for 3-6 year olds, and was the first Director of the Garfield Montessori School in Denver, CO. His goals now are to encourage parents to do early learning activities with their children and to show them how.

### **Users Review**

#### **From reader reviews:**

##### **David McCabe:**

Spent a free time and energy to be fun activity to try and do! A lot of people spent their leisure time with their family, or their particular friends. You are therefore out of date, spending your time by reading in this completely new era is common not a geek activity. So what these ebooks have than the others?

**Heather Stewart:**

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring and can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Teach Your 3-7 Year Old Math can make you experience more interested to read.
