Multimedia Information Hiding Technologies and Methodologies for Controlling Data By Kazuhiro Kondo

The widespread use of high-speed networks has made the global distribution of digital media contents readily available in an instant. As a result, data hiding was created in an attempt to control the distribution of these copies by verifying or tracking the media signals picked up from copyright information, such as the author or distributor ID.

Multimedia Information Hiding Technologies and Methodologies for Controlling Data presents the latest methods and research results in the emerging field of Multimedia Information Hiding (MIH). This comprehensive collection is beneficial to all researchers and engineers working globally in this field and aims to inspire new graduate-level students as they explore this promising field.

Editorial Review

Review

The original purpose of hiding data in electronic media was to identify authors, distributors, and other legitimate parties as part of combating piracy. Recently, however, meta data is also being hidden in media to provide additional functions to the signal. Information and computer scientists provide theoretical frameworks, recent empirical research results, and new applications for the benefit of new or experienced researchers and for media content manufacturers who would like to apply the technology. They cover information hiding for audio and speech, for images and video, for text and binary data, and for multimedia. The topics include interpolation for audio and speech signals, enhancing speech quality of telephone communications by steganography, new proposals for hiding data in paper media, self-embedding watermarking with content restoration capabilities, and a data-embedding pen. --Annotation ©2012 Book News Inc. About the Author

Kazuhiro Kondo received the B.E., the M.E. and the Ph.D. degrees from Waseda University in 1982, 1984 and 1998, respectively. From 1984 to 1992, he was with the Central Research Laboratory, Hitachi Limited, Tokyo, Japan, where he was engaged in research on speech and video coding systems. From 1992 to 1995, he was with the Texas Instruments Tsukuba R & D Center, Tsukuba, Japan and from 1995 to 1998, the DSP R & D Center, Texas Instruments Inc., Dallas, Texas, USA. During this time, he worked on speech recognition systems and multimedia signal processing. In 1999, he joined the Faculty of Engineering at Yamagata University, Yamagata, Japan. His current interests include broad aspects of speech and audio signal processing, multimedia signal processing and speech and audio quality evaluation methods. Dr. Kondo is a senior member of the IEEE and a member of the Audio Engineering Society, the Institute of Electronics, Information and Communication Engineers of Japan and the Acoustical Society of Japan.

Users Review

From reader reviews:

Douglas Quintanar:

The book Multimedia Information Hiding Technologies and Methodologies for Controlling Data can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Multimedia Information Hiding Technologies and Methodologies for Controlling Data? A number of you have a different opinion about book. But one aim this book can give many facts for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or information that you take for that, it is possible to give for each other; you are able to share all of these. Book Multimedia Information Hiding Technologies and Methodologies for Controlling Data has simple shape however, you know: it has great and massive function for you. You can seem the enormous world by start and read a publication. So it is very wonderful.

Jennifer Williams:

What do you about book? It is not important together with you? Or just adding material when you need something to explain what your own problem? How about your extra time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question since just their can do in which. It said that about publication. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need this particular Multimedia Information Hiding Technologies and Methodologies for Controlling Data to read.

Guadalupe McCoy:

Don't be worry when you are afraid that this book may filled the space in your house, you could have it in e-book approach, more simple and reachable. This Multimedia Information Hiding Technologies and Methodologies for Controlling Data can give you a lot of good friends because by you checking out this one book you have issue that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This book offer you information that probably your friend doesn't know, by knowing more than additional make you to be great folks. So , why hesitate? We should have Multimedia Information Hiding Technologies and Methodologies for Controlling Data.

Sabrina Crockett:

You can obtain this Multimedia Information Hiding Technologies and Methodologies for Controlling Data by visit the bookstore or Mall. Just simply viewing or reviewing it might to be your solve trouble if you get difficulties to your knowledge. Kinds of this book are various. Not only simply by written or printed but also can you enjoy this book by means of e-book. In the modern era such as now, you just looking from your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose proper ways for you.
