## Elasticsearch Essentials By Bharvi Dixit

**Harness the power of ElasticSearch to build and manage scalable search and analytics solutions with this fast-paced guide**

## About This Book

- New to ElasticSearch? Here's what you need—a highly practical guide that gives you a quick start with ElasticSearch using easy-to-follow examples; get up and running with ElasticSearch APIs in no time
- Get the latest guide on ElasticSearch 2.0.0, which contains concise and adequate information on handling all the issues a developer needs to know while handling data in bulk with search relevancy
- Learn to create large-scale ElasticSearch clusters using best practices
- Learn from our experts—written by Bharvi Dixit who has extensive experience in working with search servers (especially ElasticSearch)

## Who This Book Is For

Anyone who wants to build efficient search and analytics applications can choose this book. This book is also beneficial for skilled developers, especially ones experienced with Lucene or Solr, who now want to learn Elasticsearch quickly.

## What You Will Learn

- Get to know about advanced Elasticsearch concepts and its REST APIs
- Write CRUD operations and other search functionalities using the ElasticSearch Python and Java clients
- Dig into wide range of queries and find out how to use them correctly
- Design schema and mappings with built-in and custom analyzers
- Excel in data modeling concepts and query optimization
- Master document relationships and geospatial data
- Build analytics using aggregations
- Setup and scale Elasticsearch clusters using best practices
- Learn to take data backups and secure Elasticsearch clusters

## In Detail

With constantly evolving and growing datasets, organizations have the need to find actionable insights for their business. ElasticSearch, which is the world's most advanced search and analytics engine, brings the ability to make massive amounts of data usable in a matter of milliseconds. It not only gives you the power to build blazing fast search solutions over a massive amount of data, but can also serve as a NoSQL data store.

This guide will take you on a tour to become a competent developer quickly with a solid knowledge level and understanding of the ElasticSearch core concepts. Starting from the beginning, this book will cover these core concepts, setting up ElasticSearch and various plugins, working with analyzers, and creating mappings. This book provides complete coverage of working with ElasticSearch using Python and performing CRUD operations and aggregation-based analytics, handling document relationships in the NoSQL world, working with geospatial data, and taking data backups. Finally, we'll show you how to set up and scale ElasticSearch clusters in production environments as well as providing some best practices.

## Style and approach

This is an easy-to-follow guide with practical examples and clear explanations of the concepts. This fast-paced book believes in providing very rich content focusing majorly on practical implementation. This book will provide you with step-by-step practical examples, letting you know about the common errors and solutions along with ample screenshots and code to ensure your success.

### Editorial Review

#### About the Author

#### **Bharvi Dixit**

Bharvi Dixit is an IT professional with an extensive experience of working on the search servers (especially Elasticsearch) and NoSQL databases. He is currently working as a technology and search expert with GrownOut, a SAAS-based referral hiring solution provider company. He is the organizer and speaker of Delhi's Elasticsearch Meetup Group, which is one of the fastest growing Elasticsearch communities in India. He also works as a freelance Elasticsearch consultant and has helped many small to medium size organizations in adapting Elasticsearch for different use cases such as, creating search solutions for big data-automated intelligence platforms in the area of counter-terrorism and risk management as well as in other domains such as recruitment, e-commerce, finance and log monitoring. He holds a master's degree in computer science from LBSIM - Delhi, India, and has a keen interest in creating scalable backend platforms. His other interest area are data analytics, distributed computing, automations, and DevOps. Java and Python are the primary languages in which he loves to write code, and he has already built a proprietary software for consultancy firms. In his spare time, he loves writing blogs and reading the latest technology books. He can be connected through LinkedIn at <https://in.linkedin.com/in/bharvidixit>.

### Users Review

#### From reader reviews:

#### **Barry Upshaw:**

In other case, little persons like to read book Elasticsearch Essentials. You can choose the best book if you appreciate reading a book. Given that we know about how is important a book Elasticsearch Essentials. You can add information and of course you can around the world by a book. Absolutely right, because from book you can realize everything! From your country till foreign or abroad you may be known. About simple thing until wonderful thing you could know that. In this era, we can open a book or perhaps searching by internet product. It is called e-book. You may use it when you feel bored stiff to go to the library. Let's examine.

#### **Jeffrey Stampley:**

What do you with regards to book? It is not important along with you? Or just adding material when you require something to explain what the one you have problem? How about your spare time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have free time? What did you do? Every individual has many questions above. They have to answer that question due to the fact just their can do in which. It said that about e-book. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need this specific Elasticsearch Essentials to read.

**Tracy Zapata:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their free time with their family, or their own friends. Usually they performing activity like watching television, about to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? May be reading a book can be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Elasticsearch Essentials can be excellent book to read. May be it might be best activity to you.

**Marla Brinker:**

People live in this new morning of lifestyle always try and and must have the time or they will get lot of stress from both everyday life and work. So , if we ask do people have spare time, we will say absolutely of course. People is human not just a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer will unlimited right. Then ever try this one, reading textbooks. It can be your alternative within spending your spare time, the book you have read is actually Elasticsearch Essentials.
